Microsoft 365 Copilot

Wave 2 Announcements

Over the last 18 months, we've been making improvements that have resulted in **Copilot responses being faster with greater response satisfaction.** These performance enhancements are a big stride forward in helping drive value with Copilot for our customers in the Microsoft 365 apps that millions of people use every day. As we enter Wave 2 of Microsoft 365 Copilot, we are thrilled to share some key product updates:

Features and Capabilities		Availability
Copilot Pages	**Copilot Pages** in BizChat is a dynamic, persistent canvas designed for multiplayer AI collaboration. Pages are the foundation for new design system for work including creation, sharing, collaborative prompting, and grounding.	Now
Updates to Copilot in Microsoft 365 Apps	**Copilot in Excel GA** has added support for structured data, tables, and conditional formatting, simplifying, expanded access to the formula library, and visualization control. Leverage the power of **Copilot in Excel with Python** for predictive modeling, text analytics, and other capabilities for advanced analysis – no coding required.	Now Public Preview
	Copilot in PowerPoint has a narrative builder that can create an adjustable initial outline, slide transitions & animations with speaker notes. The **brand manager** can use your company's branded template and company branded images and will soon be able to automatically pull company branded images from your SharePoint organization asset library (OAL).	Now
	Copilot in Teams will cross-reference both the meeting transcript and the meeting chats when generating recaps, answering questions, and identifying action items.	Now
	Copilot in OneDrive allows you to quickly find the right content by using Copilot to reason, summarize, and compare content for up to 5 files without even opening the files.	Available end of September 2024
	Use the on-canvas suggested prompts to jumpstart content creation and iterate with Copilot on subsections of your document. In addition to Word documents, PowerPoints, PDFs and encrypted documents, **Copilot in Word** has more grounding options to reference emails, meetings, colleagues and suggested prompts when drafting content.	Now Available end of September 2024
	Prioritize my inbox from **Copilot in Outlook** analyzes and prioritizes your emails based on topics, key words, or people that are important to you and generates a concise summary of each email and insights on its prioritization. With a **new drafting experience**, composing emails is now faster and easier with suggested prompts, ability to change specific parts of an email and explore the different iterations created by Copilot.	Now Public Preview in late 2024
Copilot agents	**Copilot agents** automate and streamline processes in the background, fully managed and orchestrated by Copilot. They allow Copilot new ways to take action and execute on your behalf. **Agent builder** gives anyone the ability to easily create an agent in a simplified experience powered by Copilot Studio. You can create a Copilot agent right in BizChat or SharePoint.	Now Public preview begins in September 2024
